

CAREER OBJECTIVE

Detail-oriented Computer Engineering (Data Science) student with strong proficiency in Python, SQL, data analysis, and machine learning concepts. Seeking an entry-level role in the IT or software domain where I can apply problem-solving, programming, and analytical skills to contribute to organizational growth while continuously learning new technologies.

INTERNSHIP

Python Development Intern

EZ Training Technology, Hyderabad

April 2024 – May 2024

- Developed and tested Python programs for problem-solving, data handling, and logic building.
- Worked with Python concepts such as loops, functions, file handling, and error handling.
- Improved debugging and code optimization skills through hands-on exercises and mini-projects.

AWS Cloud Computing Intern

SmartBridge (Virtual) , Hyderabad

Jan 2026 — Mar 2026

- * Designed and deployed scalable web applications using AWS cloud services.
- * Developed “Movie Magic – Smart Movie Ticket Booking System”, enabling real-time ticket booking and seat management.
- * Utilized AWS services like EC2, S3, and RDS for deployment, storage, and database management.
- * Implemented secure authentication and optimized system performance with high availability, gaining hands-on experience in cloud architecture.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL

Data Science and ML: Machine Learning, Data Science, Exploratory Data Analysis (EDA)

Libraries and Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch

Databases: MySQL

Tools: Git, Docker, Word, PowerPoint

PROJECTS

RNN Based Web Data Mining to Track Terrorist Activities

March 2025 – January 2026

- Built an NLP-based system to detect terrorism-related content from websites and social media data.
- Applied text preprocessing and machine learning models to classify content as suspicious or safe.
- Designed a role-based dashboard for alerts and report generation (CSV/PDF).

Online Smart Parking and Reservation System

November 2024 – February 2025

- Developed a web application using HTML, CSS, JavaScript, and MySQL for parking slot booking.
- Implemented real-time slot availability, pricing logic, and secure user data storage.
- Designed database schema to manage users, bookings, and parking slots.

Bike Showroom Management System

July 2024 – October 2024

- Built a Python and MySQL-based system for managing inventory, sales, and customer records.
- Implemented CRUD operations with proper database connectivity and input validation.
- Generated reports for stock levels and sales history to support decision-making.

EDUCATION

Ballari Institute of Technology and Management

May 2022 – May 2026

Bachelor of Technology in Computer Engineering (Data Science)

Bellary Independent PU College

May 2020 – March 2022

Pre-University Education

Visweswaraiah English Medium High School

May 2010 – March 2020

Secondary Education (Class 10)

CERTIFICATIONS

- * Python Internship (by EZ Training Technologies)
- * Data Science (by Wipro)
- * Google Cloud (by Google)
- * AWS (by AWS)
